

BE SMART. BE CURIOUS. BE SAFE

AI can help you learn, create and solve problems – Use it **Safely** and Wisely.

1 AI IS A HELPER, NOT AN AUTHORITY

I can help you think!

AI can help you think but shouldn't do all the thinking for you.

If something sounds surprising or too good to be true, check another source.

2 PROTECT YOUR PERSONAL INFO

Don't share anything you wouldn't happily write on a classroom whiteboard.

AVOID SHARING

- Full name
- Address
- School
- Phone number
- Passwords
- Photos with personal info

3 ASK "HOW DO YOU KNOW?"

When AI gives you an answer, ask:

- Where did that information come from?
- Is there another side to the story?
- Is this fact or opinion?

4 USE AI TO LEARN NOT JUST TO GET ANSWERS

Instead of:

“What’s the answer to question 5?”

Try:

“Can you help me solve question 5?”

This helps you understand and grow – not just finish the work.

5 SPOT AI MISTAKES

Can you find an error in something that doesn't sound right?

AI can make mistakes or miss important details.

Make it a game – challenge AI and see what you can find!

6 REMEMBER THAT AI REFLECTS PEOPLE

AI learns from human-created information, this means it can:

- Get things wrong
- Miss things out
- Show only one side of the story

7 CREATE MORE THAN YOU CONSUME

Use AI to make things, express yourself and bring your ideas to life

- Story Ideas
- Character Creation
- Coding Projects
- Artwork Concepts
- Learning Activities
- And More!

Before You Accept an AI Answer, THINK!

T	H	I	N	K
Is it TRUE?	Is it HELPFUL?	Is the INFORMATION Safe to Share?	Do I NEED to check another source?	What do I already KNOW about this?

AI is a Powerful tool- YOU are in Charge!
Be Thoughtful, Be Kind
 Use AI tools to learn, create and make a positive impact!
